FBC Engineered & Certified Decorative Shutters, TAS 202 & ASTM E330-Uniform Static, ASCE 7-10 Wind Loads - Components & Cladding

Measuring & Pricing

Easy way: Measure the width and height of the opening; fax or email the measurements, quantity of shutters, glass separation, and styles, we will do the rest and send you a quote

Hurricane Bahama, Colonial, and Bahama over Colonial Shutter Systems

- 1 Measure the width and height of the outside opening of the window, do not include any trim, or stucco bands
Concrete block opening stucco to stucco
Siding with trim, measure from the inside of the trim to inside of trim (outside window frame to outside window frame)
- 2 Measure the glass in relation to the outside face of the building; place a straight edge across the window corner (at the most outward piece of glass), measure the clearance from the glass to the straight edge and the measurement from the straight edge to the building face (if the window frame sticks out further then the building surface). This will determine the thickness of the build out frame (BOF). Our shutter systems require 2-1/4" to 3-1/4" (depending on style) separation between the back of the shutter slats and the glass to meet Miami-Dade County Product Control Approved" requirements. The 1 x 4 BOF is included in the base price per square foot.
- 3 Add 8" to the width and height
Example: 36" wide x 48" high = 44" (36 + 8) = 56" (48 + 8) = 2,464 square inches, to convert the square inches to square feet (divide the square inches by 144 to get the square feet), $2,464 / 144 = 17.11$ sq ft (.01 to .49 round up, to .5 and .51 to .99 round up to 1) = 17.5 square feet x the price/square foot = \$/shutter.
- 4 Shutter price call, fax, or email for quote or square foot price
- 5 Hurricane shutter weight; Build out frame = 1-1/2 pounds per square foot and Shutters = 4-1/2 pounds square foot

Hurricane Shutter Systems we provide everything but the labor and tools to install the shutters

Bahama Shutter: Build out frame, shutter(s), hold out rods, hardware, and fasteners

Colonial Shutter: Build out frame, shutter(s), hardware, and fasteners

Bahama over Colonial Shutter: Build out frame, shutter(s), hardware, and fasteners

Extra cost for round top shutters (radius top), and non-stock colors

Shipping Information: Shipping and handling is a estimate subject to freight increases, residential delivery, lift gate, and fuel surcharge per day of shipping

Decorative Shutter Systems: We suggest the shutter be 4" larger then the opening (2" on each side) this depends on the style of shutter and the look you are trying to achieve

Fixed Decorative Shutters and Panels

Fixed Decorative Bahama Shutters Attached flat to the building to enhance the architectural design of large areas, no hinges, the shutters do not projection away from the building

- 1 Measure the exact size of panel you desire, width, and height, in inches (height varies /slat weld guides)

Fixed Decorative Colonial Shutters Attached flat to the building next to a window opening for architectural enhancement of the opening, no hinges, the shutters do not project away from the building

- 1 Width: Width depends on the look you are trying to achieve, shutter width over 16" wide is base price, for shutters under 16" wide we charge a premium because they are too small to fit in our frame machine
- 2 Height: Measure the height of the opening; usually the colonial fixed shutter is 4-inches larger than the opening (height varies /slat weld guides)

Fixed Decorative Shutter Panels Attach in an opening at the head (top) and/or jambs (sides) no hinges stationary units

- 1 Measure the width of the opening; the height depends on the look you are trying to achieve.

Fixed Decorative Shutters and Panels are priced by the square foot, we provide all hardware and fasteners for a complete installation

Extra cost for round top shutters (radius and arch tops), and non-stock colors

Hinged Decorative Shutters

Hinged Decorative Bahama Shutters: Hinges are located at the head (top) of the shutter with hold open/close bracket @ sill (bottom) or jambs (sides)

- 1 Width: Measure the exact opening width, we usually make the shutter 4" larger than the opening: 2-Inches on each side (jamb) this depends on the look you are trying to achieve
- 2 Height: Measure the exact opening height, we usually make the shutter 4" larger than the opening: 2-Inches on the top (head) and sill (bottom) this depends on the look you are trying to achieve

Hinged Decorative Colonial Hinges are located at the jambs (sides) of the shutter with hold open/close bracket @ head (top) and/or sill (bottom)

- 1 Width: Measure the exact opening width, we usually make the shutter 4" larger than the opening: 2-Inches on each side (jamb) this depends on the look you are trying to achieve
- 2 Height: Measure the height of the opening; usually the colonial hinged shutter is 4-inches larger than the opening (height varies /slat weld guides)

Hinged Decorative Shutters are priced by the square foot, we provide all hardware and fasteners for a complete installation

Extra cost for round top shutters (radius and arch tops), and non-stock colors

Decorative Shutter Combinations We can design almost any combination of shutter assembly you may desire, call for details

- 1 Measuring depends on the types of shutter combinations you desire. Fax, email, or call for details

Decorative Shutter Combinations are priced is by the square foot, extra fee for hinges and brackets

Extra cost for round top shutters (radius and arch tops), and non-stock colors

Shipping Information: Shipping and handling is a estimate subject to freight increases, residential delivery, lift gate, and fuel surcharge per day of shipping
